## GOODWE

## ES Series (14A)

## 3.6-5kW I Single Phase Hybrid Inverter (LV)

The GoodWe ES series of bi-directional energy storage inverters can be used for both on-grid and off-grid PV systems, with the ability to control the flow of energy intelligently. During the day, the PV array generates electricity which can be provided either to the loads, fed into the grid, or charge the battery, depending on the economics and set-up. The electricity stored can be released when the loads require it during the night, including inductive loads such as air conditioners or refrigerators. Additionally, the power grid can also charge storage devices via the inverter. An all-round intelligent system for maximum energy flexibility.

Charge controller and inverter integrated

8 ms UPS-level Switching

Maximum charge and discharge up to 100A

IP65 dustproof and waterproof

14

........

Fanless design, long lifespan

## GOODWE

Technical Data	GW3648D-ES <sup>*6</sup> GW3648C-ES <sup>*6</sup>	GW5048D-ES <sup>16</sup> GW5048C-ES <sup>16</sup>
Battery Input Data		
Battery Type <sup>*1</sup>	Li-Ion	Li-Ion
Nominal Battery Voltage (V)	48	48
Battery Voltage Range (V)	40~60	40 ~ 60
Max. Continuous Charging Current (A) <sup>*1</sup>	75	100
Max. Continuous Discharging Current (A)*1	75	100
Max. Charging Power (W)	3600	4600
Max. Discharging Power (W)	3600	4600
PV String Input Data		
Max. Input Power (W)	4600	6500
Max. Input Voltage (V)	580	580
MPPT Operating Voltage Range (V)	125~550	125 ~ 550
Start-up Voltage (V)	125	125
Nominal Input Voltage (V) Max. Input Current per MPPT (A)	<u> </u>	
Max. Short Circuit Current per MPPT (A)	17.5	17.5
Number of MPP Trackers	2	2
Number of Strings per MPPT	1	1

\*1: The actual charge and discharge current also depends on the battery.
\*2: 4600 for VDE 0126-1-1 & VDE-AR-N4105 & NRS 097-2-1, 5100 for CEI 0-21 (GW5048D-ES); 4050 for CEI 0-21 (GW3648D-ES).

\*3: Peak output apparent power can be reached only if PV and battery power is enough.

\*4: CAN communication is configured by default. If 485 communication is used, please replace the corresponding communication line.

\*5: 4600 for VDE 0126-1-1 & VDE-AR-N4105 & NRS 097-2-1, 4600 for CEI 0-21 (GW5048D-ES). \*6: FOR AUSTRALIA ONLY. Model GW3648D-ES and GW5048D-ES inverters are designed

without DC switch. For inverters designed with DC switch, the model name should be GW3648C-ES and GW5048C- ES. \*7: For Australia Max. Short Circuit Current per MPPT (A) please refer to 'Manufacturer declaration: short circuit current'. \*: Under off-grid mode, then battery capacity should be more than 100Ah. \*: When there is no battery connected, inverter starts feeding in only if string voltage is

higher than 200V.

\*: AFDPF: Active Frequency Drift with Positive Feedback, AQDPF: Active Q Drift with Positive Feedback.

\*: Please visit GoodWe website for the latest certificates.
